

INDIGO WELLNESS

Inventory Control

A smarter way to track, locate, and manage products across Stamford and Westport.

May 2026

What Indigo is experiencing today

Running Out of Stock

Items sell out before reorders are placed.
No alerts, no reorder triggers, no forecast.

No Centralized System for Inventory Location

Staff have limited visibility of what each location has in stock. Time is lost searching across two sites. The incoming shipments are ignored too.

Sensitive Data

Many transactions and messages contain sensitive, HIPAA-prohibited information that cannot be processed by AI unfiltered.

A single tool built for how Indigo actually operates

01

Track per location

Live stock levels for Stamford and Westport separately

02

Auto reorder alerts

Reorder points calculated from batch size + shipping lead time

03

Shipment management

Log incoming orders, mark received, auto-update quantities

04

Transfer tracking

Record every inter-location move with reason and audit trail

05

AI-powered import

Paste or upload any order information, AI extracts products instantly

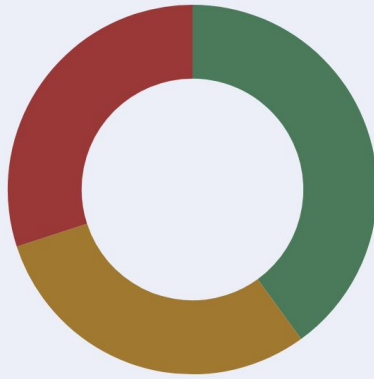

**Built as a
single HTML file**

No installation.
No login.
Works in any browser.
Data stored locally.

Offline capable
↻ Auto-saves

Dashboard & Inventory View

 Dashboard

Stock level by location
with Stamford & Westport
donut charts side by side

4 OK 3 Low 3 Critical

Needs attention alerts show
critical items instantly

≡ **All Items**

Item	SKU	Stamford	Westport	Status
Product A	—	42	28	OK
Product C	—	2	1	Critical
Product F	—	3	1	Critical
Product B	—	9	4	Low

Per-location quantities · Stock level bar

Q&A

Questions, feedback, and discussion

- How does this fit with our existing booking system?
- Who updates quantities — front desk or back office?
- How do we handle product variants (size, color)?
